Legend to Quick Reference Guide for Red Arrow Products

* All green (YES) items are typically safe on polished aluminum, but you should spot test an inconspicuous area for surface compatibility. Factors such as ambient and surface temperature, water quality, and chemical concentration can alter the performance of the products. Refer to "Safe for Polished Aluminum" below.

** Washing class is a generalization of the product. The listing contains the most prevalent use of the product. Other uses and application may apply. Refer to "Washing Class" below.

Description:

The Description is the name of the Red Arrow Product.

Aggressive Cleaning Scale:

The Aggressive Cleaning Scale is a subjective rating of the cleaning abilities of the products rated from mild (1) to heavy (10).

Safe for Polished Aluminum:

See Note(*) above. **N/A** designates a product that would not be used, or should not be used, on polished aluminum surfaces. Polished aluminum surfaces are subject to streaking if the incorrect product is applied or even if the correct product is applied but allowed to dry. Always totally wet the surface and rinse before it dries.

Safe for Brushed Aluminum:

Brushed aluminum surfaces can be cleaned successfully using the correct Red Arrow products. Constant use of Red Arrow products will allow oxidation to be minimized or reduced completely while protecting the surface between washes. Always totally wet the surface and rinse before it dries.

Washing Class:

See Note (**) above.

1 or 2: Can be used as 1-Step washing or as the second chemical in 2-Step washing.

1st: Acidic pre-cleaner to be used as chemical #1 in 2-step washing.

Steam: Used in hot water washing or steam cleaning.

Treat: Special treatment chemical. Apply for its specific use.

Pre: Used as a pre-treatment depending on its specific use.

Spec: Designates a special use of this product.

Floor: Designed for floor cleaning.

Parts: Designed for parts cleaning.

Gen: General-purpose cleaning.

Cleaning Type:

The cleaning type provides a generalized overview of the main cleaning characteristics and uses of the product.

Caution:

Always consult the Red Arrow MSDS Sheet for proper use of each product.
